

Oct/28, 1973

Dear, Ralph Hocking

It is very near future to see you and N.J. Paik,
because, it was true what N.J. told you me.

I will be in J.F.K. on 1st of Jan., and will
stay in Rochester for learning of Kodak printing
machine (photographic) from Jan 3rd to Feb 1st.

After that, I'll be in N.Y.C. for 5 days.

I am sure I'll be in Binghamton on Saturday, Sunday
(perhaps 2 to 3 times), and will work for your future
Shock.

Only one problem is I must take young Engineer from
Tokyo with me, but you will help me how to spend
his holiday in Rochester or Binghamton.

I need electronic parts for your V.S., please prepare
before I come, — see list

Well, I have new synthesizer for me now, but

I have not been working for this V.S. at all,
because I must have much time for getting Camera
monitor and so on.

Nam, June said me to use this V.S. for E.T.C.

I think it may be more powerful of E.T.C. in U.S.A..

This V.S. is almost same size and same function as
your V.S., you don't bother how to repair it.

If, you would like to get this, You should prepare
Rack, Scan converter section and some tiny part.

but it will not be so difficult after I'll be in BGM.

Price of it is maybe \$ 2,400, and if you would like to have it

I'll take it from Tokyo to Binghamton.

Sincerely

Shunya Abe
